Set your bricks free. Then build, create and display.

Current press brief | October 23, 2026

What Brick Finder does

Brick Finder connects the bricks you own with inventory, build discovery and creative tools. Identify pieces with BrickVision, review the suggestions, organize your collection, see possible builds and find missing parts. Brick Finder was founded by Mike Dunn of Magness Enterprises LLC.

A studio for building, characters and display

Brick Studio offers more than 1,800 interactive 3D models, including alternate builds, with step-by-step assembly playback. Builders can also start on a baseplate, choose parts, change colours and edit their own creations. Minifig Maker combines heads, torsos, hats, accessories and poses. Its Face Studio lets users draw a face and reshape the eyes, brows and mouth. Scene tools support posed characters and captured frames. Display Room provides a navigable 3D showroom for models and minifigures.

New in the browser: Mosaic Maker

Choose a photo and turn it into a two-dimensional brick mosaic. Display mode uses the official colour palette; Buildable mode limits the suggested piece/colour combinations to the supplied availability catalogue. Users can save a picture, CSV part list, printable PDF sheet or a build video where their browser supports recording. Photos are processed locally in the browser and are not uploaded. A mosaic is not a photo-to-3D reconstruction; physical backing, attachment and current parts availability still need to be checked.

BrickVision and offline use

BrickVision uses multiple photo views and layered computer vision to suggest matches. Users review suggestions before saving them. Results depend on the pieces, image quality, device and capture conditions. The app is designed for offline and on-device use with locally available content. Downloads, purchases and connected services need internet access. Browser demos and native app versions can differ; browser export support depends on the device.

Availability and published US offer

The website lists a scheduled October 26, 2026 launch, subject to change. Check brickfinderapp.com for app-store availability. The published US launch offer is US$2.50 per year (regular US$9.99 per year), retained while membership remains continuously active. The website also lists 1,776 Lifetime Founder memberships at US$17.76 once, with availability to be confirmed. Local store prices may differ. Joining the launch notification list does not purchase or reserve a membership.

Media, contact and credits

Press contact: pr@brickfinderapp.com. Website and media: https://brickfinderapp.com/media. Credit supplied product imagery to Brick Finder / Magness Enterprises LLC. Keep LDraw Official Model Repository (CC BY) attribution with its 3D model images. Use the supplied logo without distortion or recolouring; the approved logo orange is #FF7500. LEGO is a trademark of the LEGO Group. Brick Finder is independent and is not affiliated with, endorsed by or sponsored by the LEGO Group.
